I love it!

Dear customer,

First of all, thank you for choosing CosmoThemes and purchasing one of our Premium Themes – your choice is greatly appreciated!

Current version of **I love it!** has been developed for WordPress 3.0 and above and is not backwards compatible with older versions of WordPress.

I love it! has been tested in all modern browsers: IE 7, IE 8, IE 9, Opera, Firefox, Safari and Chrome.

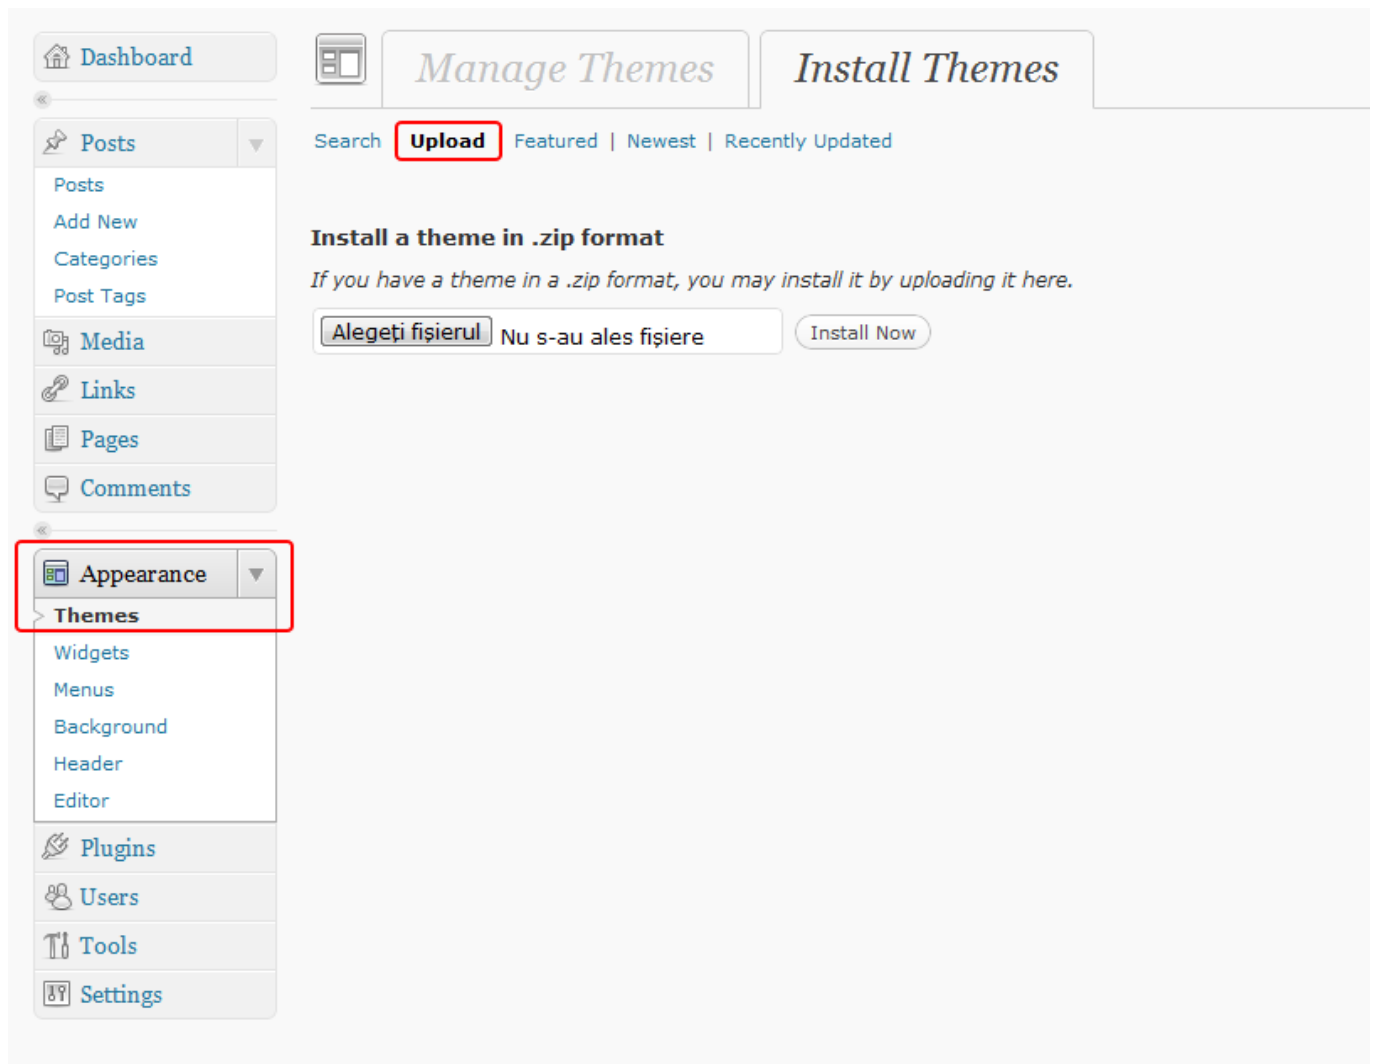

If you happen to face some difficulties with this theme, consider to use our support which is conducted ONLY through the CosmoThemes support forums: <http://cosmothemes.com/forums>

1. INSTALLATION INSTRUCTIONS

1. Go to your WordPress Backend.
2. Open **Appearance - Themes - Install Themes**
3. Navigate to **Upload**
4. Browse for **.zip** file on your local computer, and Install it.
5. Then go to back to **Appearance - Themes**, and **Activate** theme

You can also upload the theme manually via FTP, into the folder `/wp-content/themes/`

After successful **activation**, go to the left side area of the backend to control Theme's specific settings.

Set boxed content style

☒ Yes ☐ No
check for boxed content style.

Set background color

Set footer background color

Update Settings

Thank you for creating with [WordPress](#). • [Documentation](#) • [Freedoms](#) • [Feedback](#) • [Credits](#)

The theme offers infinite color styles. Choose your preferred color for Footer and Content area.

2.2 BACKGROUND STYLING OPTIONS

Select Theme Background :

Feel free to choose from a range of 10 different backgrounds for your site.
If you do not wish a background pattern simply choose the last blank one.

2.3 CUSTOM TEXT-BASED LOGO

Type Title	<div>Text Logo</div> <div>Enable text-based Site Title and Tagline.</div>
Font Family	<div>Francois One</div>
Font Size	<div>24</div>
Font Weight	<div>Normal</div>
Preview Text	<div>Test text for preview</div>

Either upload your personalized logo or opt for a text-based logo and choose from a variety of free fonts from Google. Set font family, font size and weight. A live preview will help you choose the best style.

2.4 MULTI-LEVEL JQUERY MENUS

We recommend you to create your own custom menu which will appear just below the default one. To do so, go to **Appearance – Menus** and create a *new* menu. E.g.: Header.

Then, from **Theme Locations** choose for **Main menu** the newly menu you have just created

The screenshot shows the 'Menus' screen in WordPress. At the top, a yellow message box states: 'The Header menu has been successfully created.' Below this, the 'Theme Locations' section on the left shows two locations: 'Header menu' and 'Footer - menu'. The 'Header menu' is selected and highlighted with a red box. The 'Header' menu is being edited, with the 'Menu Name' set to 'Header'. There is a checkbox for 'Automatically add new top-level pages' which is checked. A 'Delete Menu' link is visible. The main area on the right says 'Select menu items (pages, categories, links) from the boxes at left to begin building your custom menu'.

Populate the menu as desired by dragging and dropping custom links, pages or categories. Press **Save Menu**.

You can set the number of visible page items in the main menu. To do so, navigate to **I love it! - Menu**

Remaining pages will be visible from the dropdown menu item “More”.

To enable or disable the default menu go to **I love it! - Menu**

2.5 FACEBOOK CONNECT

To use this feature you need to create an Application in your Facebook account (<https://developers.facebook.com/apps>) and copy its ID and Secret Key into corresponding inputs from admin panel available at **I love it! – Social**.

Facebook Application ID

You need this to be able to moderate FB comments.

Facebook Secret key

3. POST SETTINGS

3.1 CUSTOM PAGE TEMPLATES

Layout and Sidebars

Select layout type

Right Sidebar

Select sidebar

main sidebar

[Add new Sidebar](#)

By default, the layout is set in 2 columns aligned by right side. You can now choose the page template aligning the content by left side or opting for full-width display (no sidebars).

This option is available both for posts and pages.

3.2 SIDEBARS

Set title for new Sidebar

Add New Sidebar

List of generic dinamic Sidebars

this is a custom sidebar

[Edit](#) [Delete](#)

If you choose the **Sidebar Layout** for your post, you can display different sidebars at your desire. Select which Widget Area will be shown for each particular post from the select bar below the **Post Layout**. By default, the Main Area will be shown.

You can add individual sidebars for specific posts. Create your New Sidebar then go to **Appearance – Widgets** and populate your Areas with desired Widgets.

3.3 SHORTCODES

Shortcodes

Columns
Button
Tabs & Toggles
Info Box
Typography
Map/Contact

Columns:
Select number of columns

CosmoThemes comes with 100+ shortcodes to choose from:

Columns, Buttons, Tabs & Toggles, Info Boxes, Typography, Map/Contact, Tables.

Each section comes with various options. After customizing your shortcode press **Insert**. The shortcode will be inserted in the above **Post** text area. Make sure not to delete or alter any inserted tags.

If you feel that the shortcode generates a defect layout make sure to eliminate any spaces and breaks between them.

3.4 MAP / CONTACT SHORTCODE

Title Info

Description Info

Contact phone 1

Contact phone 2

Fax

Contact email
support@cosmothemes.c

Additional Info

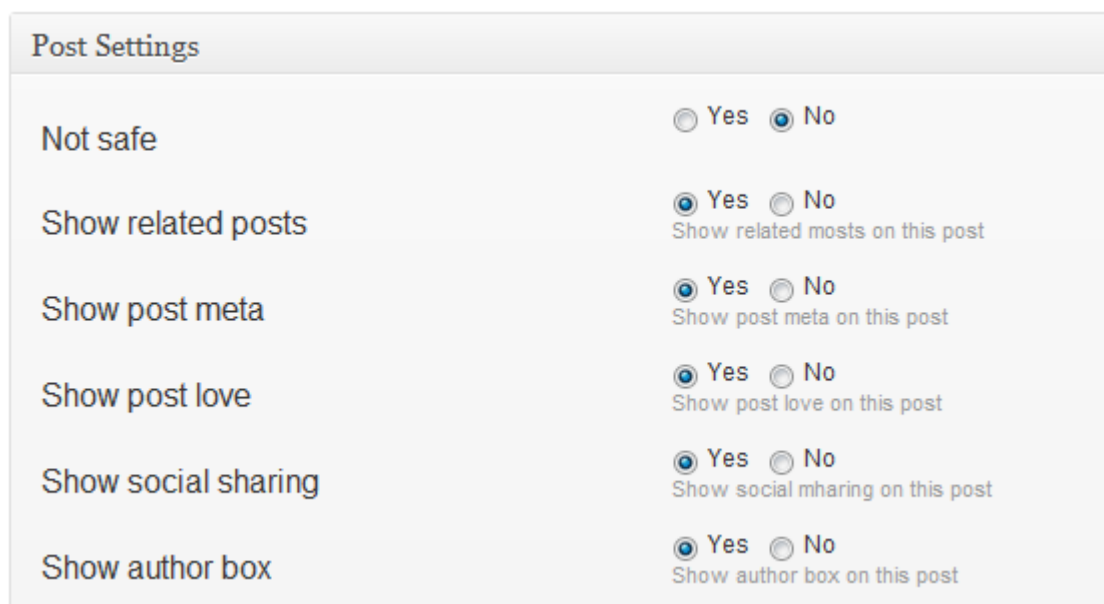

You can insert a custom contact form on literally any page. Go to **CosmoThemes Shortcodes** from **Page/Post Edit Form**, choose **Map/Contact Form** tab and inset your data.

You will need a Google map key in order for the map to appear on the page. To get one go to:

<http://code.google.com/intl/en-US/apis/maps/signup.html>

If you wish, you can hide the Contact Form and leave only the map. Check **Hide Contact Form** for this purpose.

3.5 SHOW/HIDE META ELEMENTS

The screenshot shows a 'Post Settings' panel with the following options:

Setting	Yes	No	Description
Not safe	<input type="radio"/>	<input checked="" type="radio"/>	
Show related posts	<input checked="" type="radio"/>	<input type="radio"/>	Show related posts on this post
Show post meta	<input checked="" type="radio"/>	<input type="radio"/>	Show post meta on this post
Show post love	<input checked="" type="radio"/>	<input type="radio"/>	Show post love on this post
Show social sharing	<input checked="" type="radio"/>	<input type="radio"/>	Show social sharing on this post
Show author box	<input checked="" type="radio"/>	<input type="radio"/>	Show author box on this post

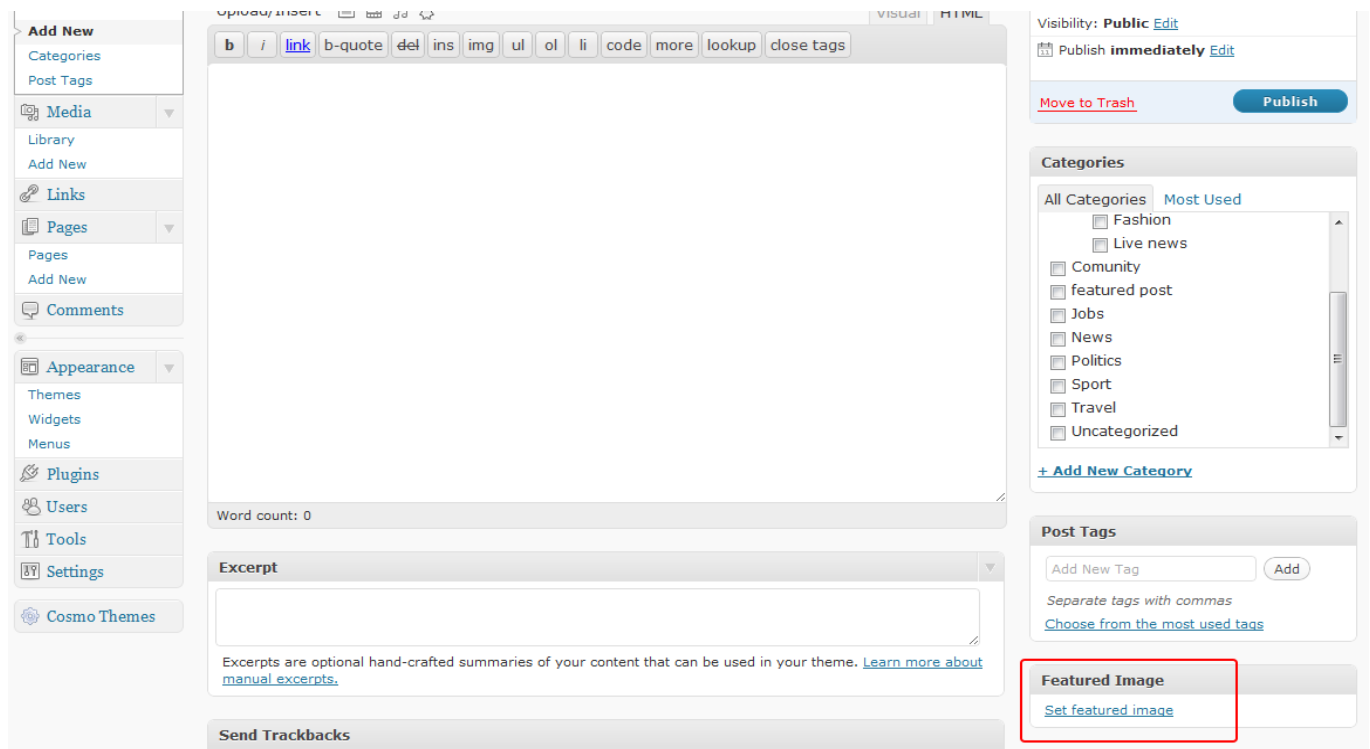

For each post/page you can choose which **meta** element will be shown or hidden. These values will override the default ones.

3.6 FEATURED IMAGES

In order to use images for your posts please use **FEATURED IMAGES**.

You can show the featured Image both on the category/archive page and on single. Enable or disable it from **I love it! – General**.

When adding/editing a post, on the right side you will see a box: **Featured Image**.

Click on it, upload an image and then click the “use as featured image” link.

Caption

Description

Link URL

Enter a link URL or click above for presets.

Alignment ☐ None ☐ Left ☒ Center ☐ Right

Size ☐ Thumbnail (150 × 150) ☐ Medium ☐ Large ☒ Full Size (600 × 200)

Don't forget to set the **Image Caption** to show users what the image is about.

3.7 KEYBOARD NAVIGATION

Users can use keyboard navigation to surf around posts.

Use keyboard's J, K, L, C, V and R keys for different actions on your site: next post, previous post, love a post, comment post, view post or display a random post.

Enable or disable keyboard demo from **I love it! – General**

3.8 LOVE

You can let users Love your posts by enabling this feature from **I love it! – General**
If enabled, set a limit of likes to turn your posts into Featured.

Enable Love for posts	<input checked="" type="radio"/> Yes <input type="radio"/> No
Minimum number of Loves to set Hot	<input type="text" value="2"/> <small>Set minim number of like's for post to change it in hot post</small>
Simulate random number of Loves for posts	<input type="button" value="Simulate"/> <small>WARNING! This will reset all current Loves.</small>

You can also generate a random number of likes for your posts.

After having a certain number of posts with enough Likes you can set your mainpage to show Featured posts.
Navigate to **I love it! – Mainpage** and select this resource type.

If you disable Love for posts, you can only select **New posts** and **Static page** for your mainpage.

3.9 POST FORMAT

Post Format	
Select post format	<input type="text" value="Video"/>
Set video Url (youtube , vimeo)	<input type="text"/> <small>If a valid Youtube or Vimeo URL is provided, the embeded video for the provided link will be appended at the beginning of the post content. Otherwise it will be ignored.</small>

Choose the corresponding format of the Post to correctly add a video, image, audio, attachment or standard post.

Using Youtube and Vimeo URLs for video posts will automatically set a [Featured image](#) for the post and crop all thumbnail sizes.

4. VIEW POST

4.1 BREADCRUMBS

By default, the breadcrumbs are disabled.

Enable it from **I love it! – General**.

Home > Wallpapers > Nunc lacinia, augue nec tincidunt commodo

4.2 POST META

 Edit :  admin :  6 days ago :  1 :  astronaut, peanut :  Funny pictures

If you do not wish to show Post Meta, disable it from **I love it! – General**.

Individual posts settings will have priority over General.

The post meta comes in 2 styles: vertical and horizontal. Choose whichever suits your needs best.

4.3 SOCIAL SHARING

Each post by default has the Social Sharing feature enabled. It can be disabled from Theme's backend menu: **I love it! – Blogging**.

4.4 ABOUT THE AUTHOR

Each post will show the information about the author of the article. Enable or disable this feature for all posts or for particular ones. Go to **I love it! – Blogging** to set global values.

Choose from backend how many similar posts to display for individual posts: **I love it! – Blogging**

4.6 NESTED COMMENTS

Mr WordPress July 14, 2011

Reply

Hi, this is a comment.

To delete a comment, just log in and view the post's comments. There you will have the option to edit or delete them.

vasile August 8, 2011

Reply

Hi, this is a comment.

To delete a comment, just log in and view the post's comments. There you will have the option to edit or delete them =D

Go to **Settings – Discussion - Enable threaded (nested) comments X levels deep** and select the deepness level.

If you choose to disable nested comments, all the previous nested comments will be displayed as simple ones.

4.7 FACEBOOK COMMENTS

To enable Facebook comments go to **I love it! – General**

Insert your application ID so you can moderate comments, or choose other settings as:

- Make every post public by default
- Approve each comment before it appears
- Allow users to post using other login providers, etc.

Leave a reply

Global Settings

Application ID: 228796030464932

[Moderate application comments](#)

Application Developers: Vasile Rusnac

Moderators:

Jeeos Jeeo ✕

Alex Guzun ✕

Moderation mode:

☒ **Make every post public by default.**

Posts matching the strings in the blacklist will be sent to the moderation queue.

☐ **Let me approve each comment before it appears.**

Posts matching the strings in the blacklist will automatically be hidden and not added to the moderation queue. To make sure everything goes through moderation regardless of content, do not specify a blacklist.

Blacklisted words:

Other login providers: ☒ **Allow users to post using other login providers.**

Grammar filter: ☒ **Automatically correct common grammar mistakes.**

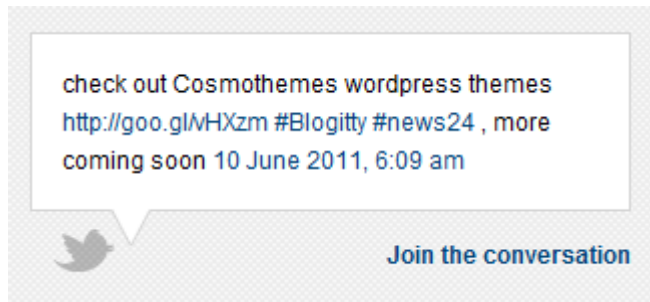

Comments Composer:

☐ **Always show.**

☒ **Collapse when there are more than 5 comments.**

5. WIDGETS

5.1 TWITTER WIDGET

To display your Twitter posts go to **Appearance – Widgets** and drag and drop the **Latest Tweets** widget to one of desired **Sidebars**. Then set the Twitter **username** and the **number** of latest tweets you want to show.

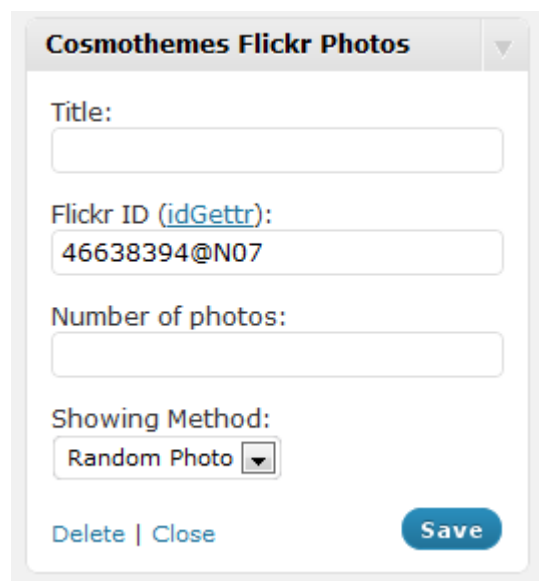

Choose between the **animated** version and static one. The animated version will display 1 tweet at a time.

A screenshot of the Twitter widget configuration form. It has a light gray background. The form contains the following fields: "Title:" with an empty text box; "Twitter User Name:" with a text box containing "cosmothemes"; "Number of latest tweets to show:" with a text box containing "10"; and "Animated:" with an unchecked checkbox. At the bottom left are the links "Delete | Close" and at the bottom right is a blue "Save" button.

5.2 QUICK CONTACT FORM WIDGET

To display Contact Form Widget go to **Appearance – Widgets** and drag and drop the **Quick Contact Form** widget to one of the **Footer Widget Area**. Then set your **desired email** and press **Save**.

5.3 FLICKR WIDGET

The screenshot shows a configuration window titled "CosmoThemes Flickr Photos". It contains the following fields and controls:

- Title:** An empty text input field.
- Flickr ID (idGettr):** A text input field containing the value "46638394@N07".
- Number of photos:** An empty text input field.
- Showing Method:** A dropdown menu currently set to "Random Photo".
- Buttons:** "Delete | Close" on the bottom left and a blue "Save" button on the bottom right.

To display Flickr Widget go to **Appearance – Widgets** and drag and drop the **CosmoThemes Flickr Photos** widget to one of the **Widget Areas**. Set your desired ID and display preferences.

To find out your ID visit <http://idgettr.com/> , insert your username and copy the generated ID:

idGettr

Use this tool to find your Flickr user or group id. Just enter the address of your photostream or group pool and it'll find the number for you.

id: 62811502@N06

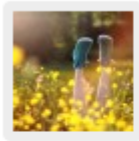

5.4 TABBER WIDGET

To display Hot and New posts, Latest Comments and Tags drag and drop the Tabber Widget to one of your sidebars.

Set values to display the desired number of entries.

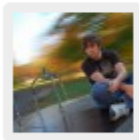

If Facebook comments are enabled there will be only 3 tabs: hot, new and tags.

hot | new | tags

Ut fringilla felis non est
dictum blandit.

1 | 177

Sed eu est nisl, a pharetra
augue

1 | 136

Nulla et rutrum velit.
Aenean turpis elit

1 | 225

5.5 TOP AUTHOR WIDGET

In order for the Top Author Widget to function you need to install the WordPress JetPack plugin available at:

<http://wordpress.org/extend/plugins/jetpack/>

This plugin will enable posts and author statistics that will calculate top authors by a certain period of time.

5.6 CATEGORIES WITH ICONS

To use an enhanced Category Widget go to **Appearance – Widgets** and drag and drop the **Category Icons** widget.

You can select an icon for each category from the provided drop-down list.

The icons list is automatically generated from the images names located in
/\$theme_directory\$/images/category_icons/

So, simply upload a new png image sized 16x16px and it will appear in the widget's dropdown list.

6. LANGUAGES

Firstly you'll need a tool allowing you to translate .po file into your language.

You can use Poedit app, or CodeStyling WordPress Plugin.

<http://www.poedit.net/>

<http://www.code-styling.de/english/development/wordpress-plugin-codestyling-localization-en>

Open .po file from /languages/ folder of the theme, and start translating each word to your language.

After you finished, click button "Save Catalog", and it will create a new .mo file in the same folder.

Then you'll need to open wp-config.php file from the root folder of your WordPress install, and replace this line:

```
define ('WPLANG', '');
```

with something like:

```
define ('WPLANG', 'fr_FR');
```

Then make sure that .mo file from /languages/ folder of our theme has the same name as your language code:
"fr_FR.mo"

More information you can find here: <http://www.catswhocode.com/blog/how-to-make-a-translatable-wordpress-theme>
