WPML Multilingual Translation

Theme options string variables is provided in theme root folder by file name wpml-config.xml . It requires WPML string translation plugin to translate these strings.

Uploading Kaleido via FTP to Wordpress

1. Download the zipped theme pack to your local computer from themeforest and extract the ZIP file contents to a folder on your local computer.
2. Using an FTP client to access your host web server.
3. Upload the Theme files in the extracted folder called 'kaleido' (its inside the extracted 'kaleido-packed') to wp-content/themes directory provided by WordPress. Please make sure you're uploading the files from the extracted kaleido zip.
4. Visit Administration > Appearance > Themes, under the Manage Themes tab, under the Available Themes, if necessary navigate to the page displaying that Theme, then click the Activate link to make the Theme, the Current Theme.

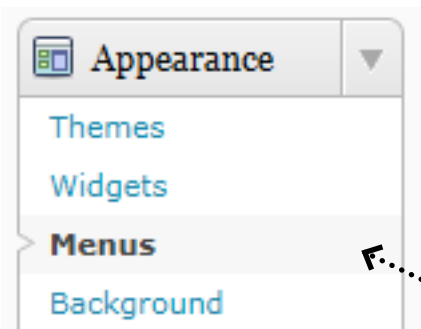

Once Activated you'll get the Kaleido theme options in the sidebar.

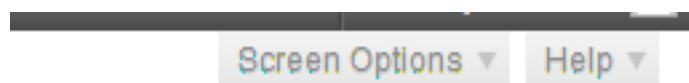

Building the Menus

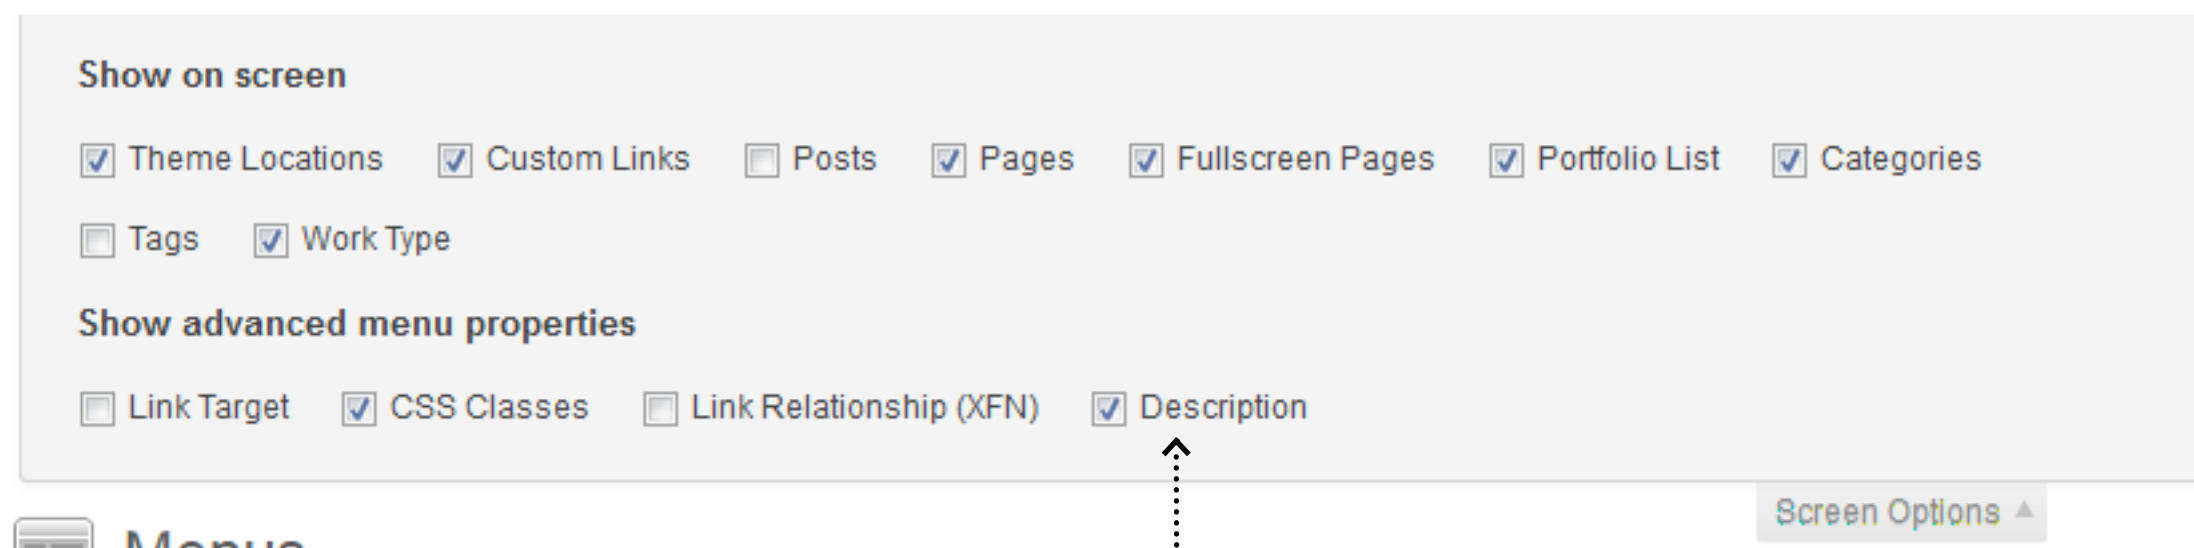

- Enable Descriptions

1
Click Menu
Clicking will display Menu Builder Screen.

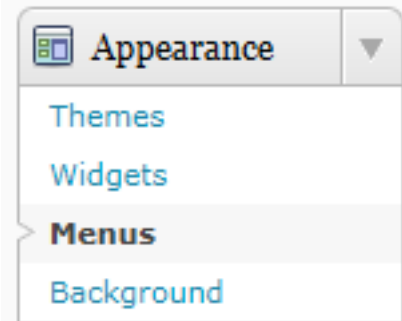

2
Screen Options
Click Screen Options. This tab is displayed on the top right corner of the browser window.

3
Enable Descriptions Check
Enable Descriptions Tab.

Building the Menus

- Create Menu

1

Enter a Name
Enter an name for your Menu and Click Create Menu tab

Menu Name

Create Menu

To create a custom menu, give it a name above and click Create Menu. Then choose items like pages, categories or custom links from the left column to add to this menu.

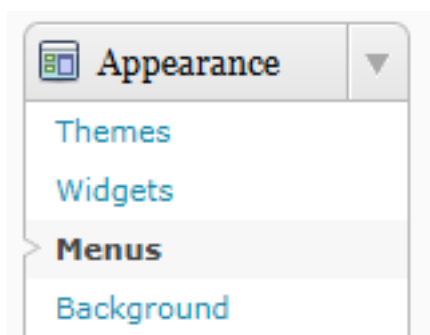

After you have added your items, drag and drop to put them in the order you want. You can also click each item to reveal additional configuration options.

When you have finished building your custom menu, make sure you click the Save Menu button.

2 Create Menu

Building the Menus

- Adding more items

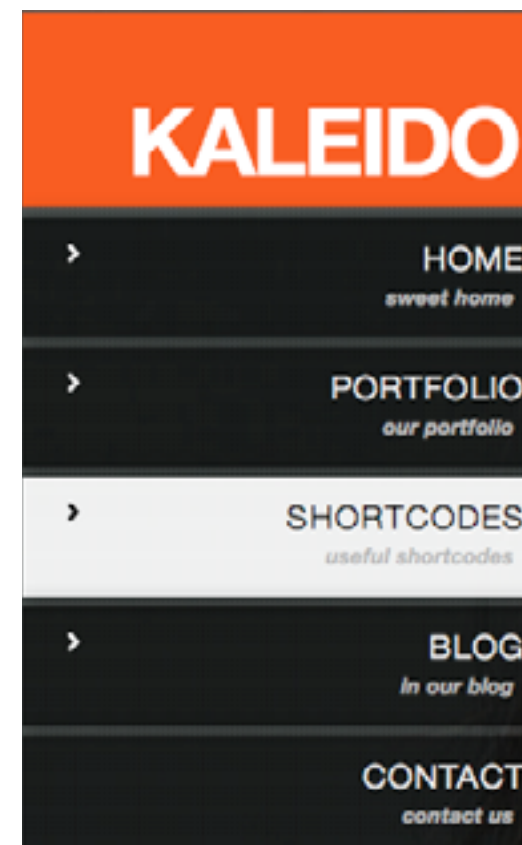

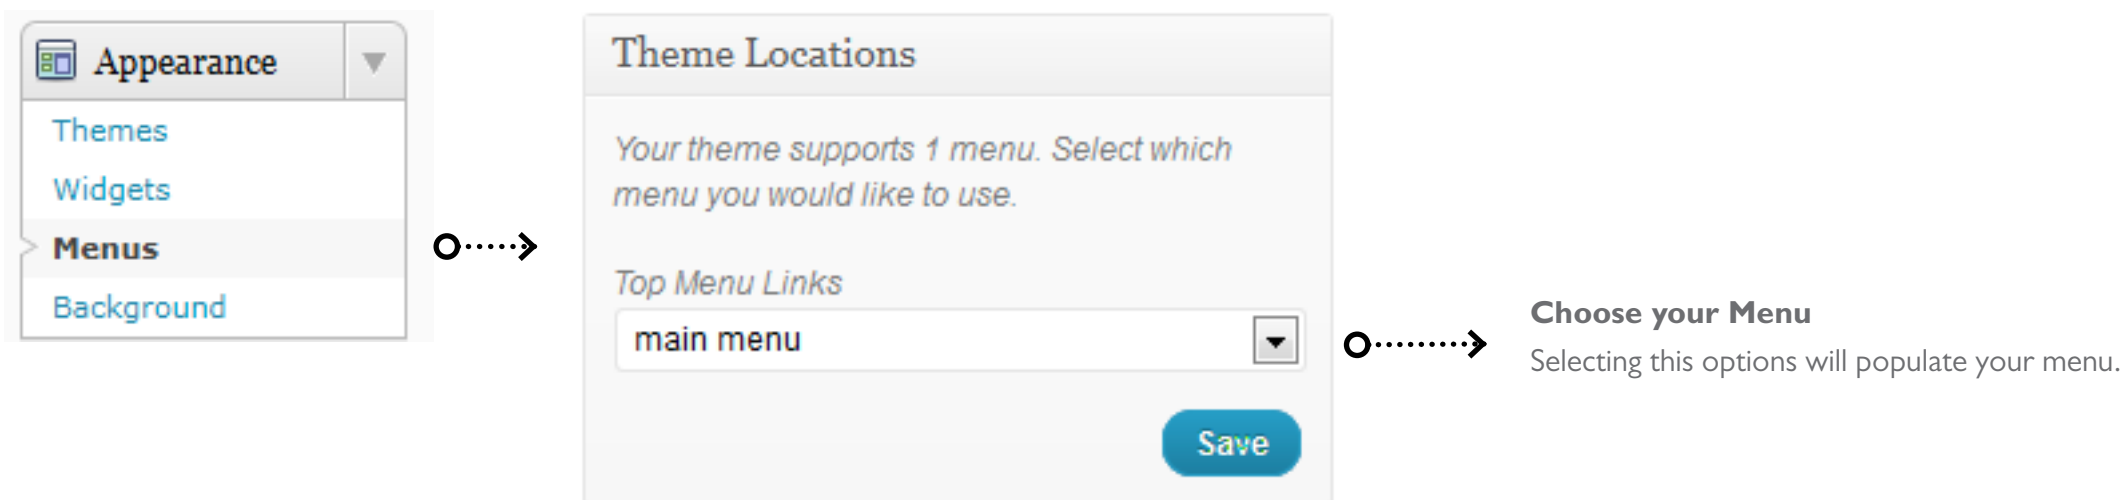

The screenshot shows the WordPress 'Appearance' menu on the left, with 'Menus' selected. An arrow points from the 'Menus' menu to the main menu editor. The main menu editor shows three items: 'Portfolio', 'Filtered Portfolio', and '3 Column Portfolio', each with a 'Page' dropdown. Below the main menu editor, there are two panels: 'Pages' and 'Categories'. The 'Pages' panel shows 'Sample Page' and an 'Add to Menu' button. The 'Categories' panel shows 'Uncategorized' and an 'Add to Menu' button. A dotted arrow points from the 'Add to Menu' button in the 'Categories' panel to the '3 Column Portfolio' item in the main menu. A red circle with the number '1' is next to this arrow. Another dotted arrow points from the 'Add to Menu' button in the 'Pages' panel to the 'Filtered Portfolio' item in the main menu. A red circle with the number '2' is next to this arrow. A vertical dotted arrow points from the 'Filtered Portfolio' item to the '3 Column Portfolio' item, indicating indentation.

Create more item
Pages, Categories or Custom Post Types can be added easily by selecting and clicking 'Add to Menu'

Indenting
Indenting the items creates sub menus for the Photo Menu

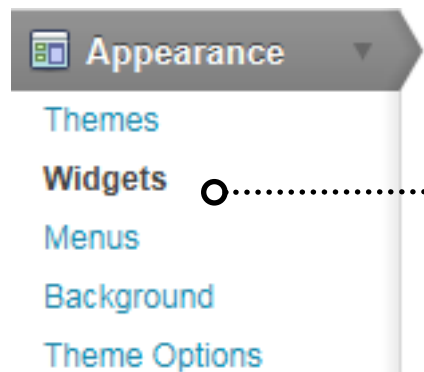

Building the Menus

- Activating the menu

NOTE: Refer to Official Wordpress Menu Guide
http://codex.wordpress.org/WordPress_Menu_User_Guide

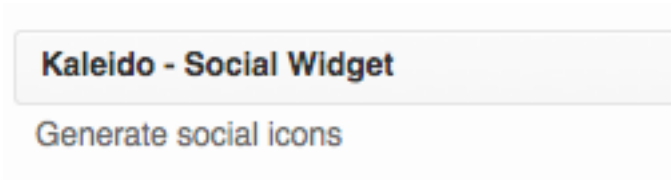

Social Header icons

1

Social Widget

The Social widget can be found in the Widgets list area in wp-admin.

NOTE: Drag and drop the Social widget to Social Header Widget area and activate your social links.

2

Social icons

The social icons can be generated by populating your social links in the input fields.

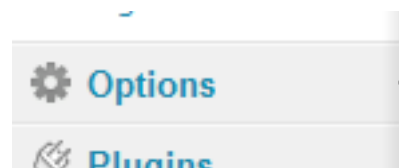

Some Social icons set links

Applying Sidebars

Multiple Sidebars

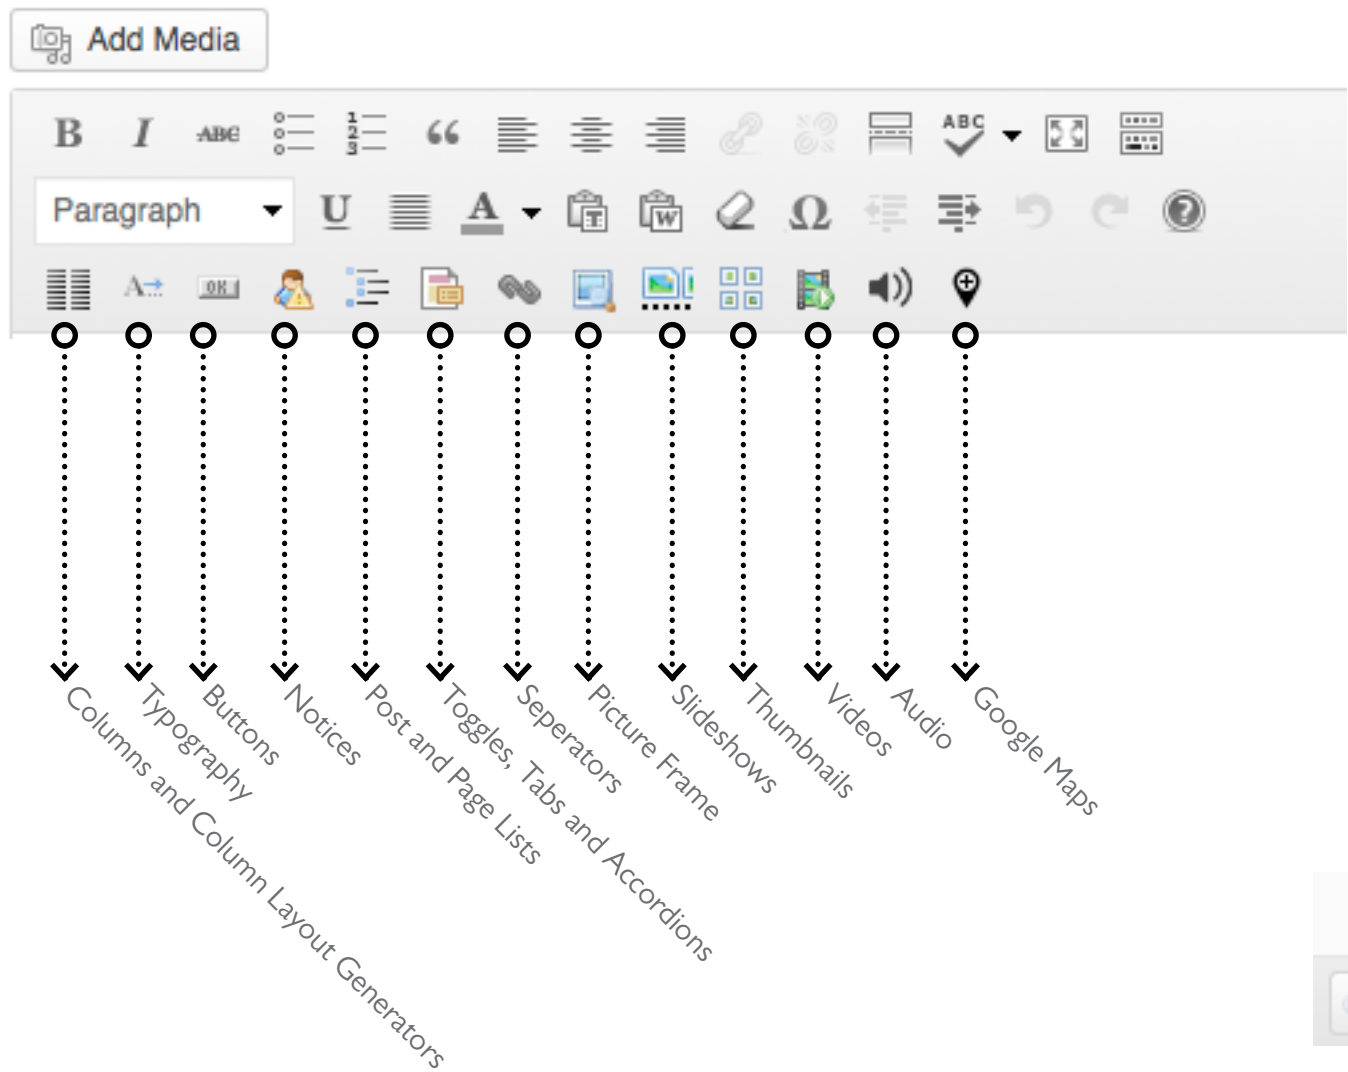

Activate Sidebars by entering a Name for it
You can activate sidebars on demand by giving the sidebars a name. Active sidebars are listed in the Widgets area.

Sidebar 1 to 20
'Choice of Sidebar' option is found in all Post and Page editing screen.

Shortcodes Generator

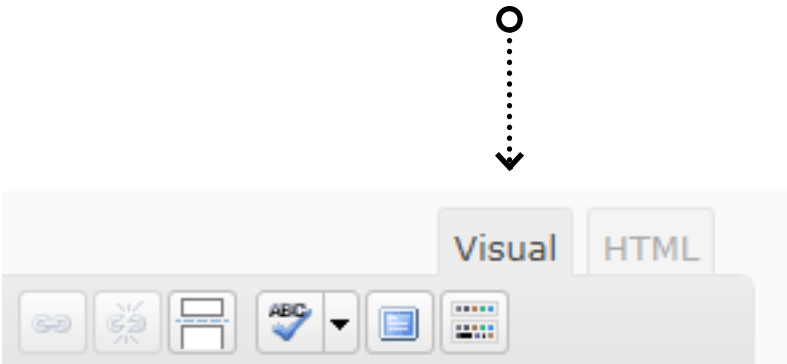

Shortcodes GUI

The feature of Generating Shortcodes through the Post and Page editor makes it a breeze to apply Shortcodes. There is no longer need to memorize or refer to any of them. Clicking each shortcode button gives you a Pop-up with the configurations required to generate them right into the editor.

Complex text layouts can be generated using the Columns Shortcode.

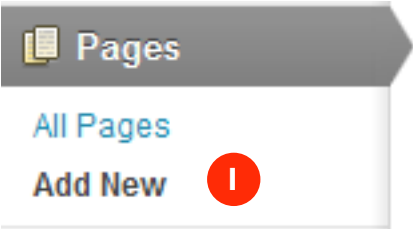

NOTE:
For the Shortcode GUI to be visible you'll need to be in the Post or Page editor in 'Visual' mode.

NOTE:
The **Thumbnails** and **Slideshow** shortcodes require image attachments in the post or page it's generated in. Just upload Multiple images to the post or page and click save - no need to insert the image to the contents area manually. Once the shortcode is generated it'll pick the attached images and display them.
