## WPML Multilingual Translation

Upon detecting WPML plugin RSW theme places language translation drop down menus above the social header and under the responsive menu for mobile devices. These functions are placed for best responsive features.

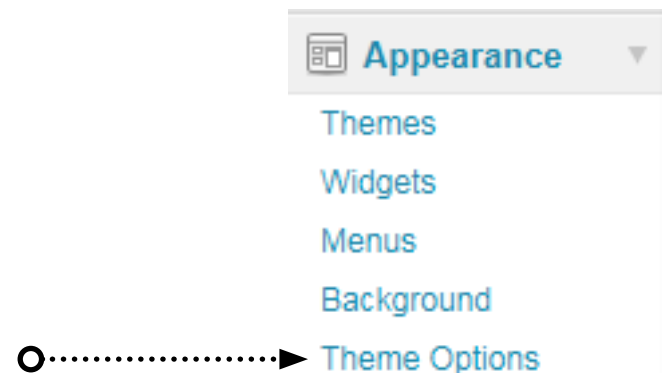

If the plugin isn't active it skips these functions without displaying them.

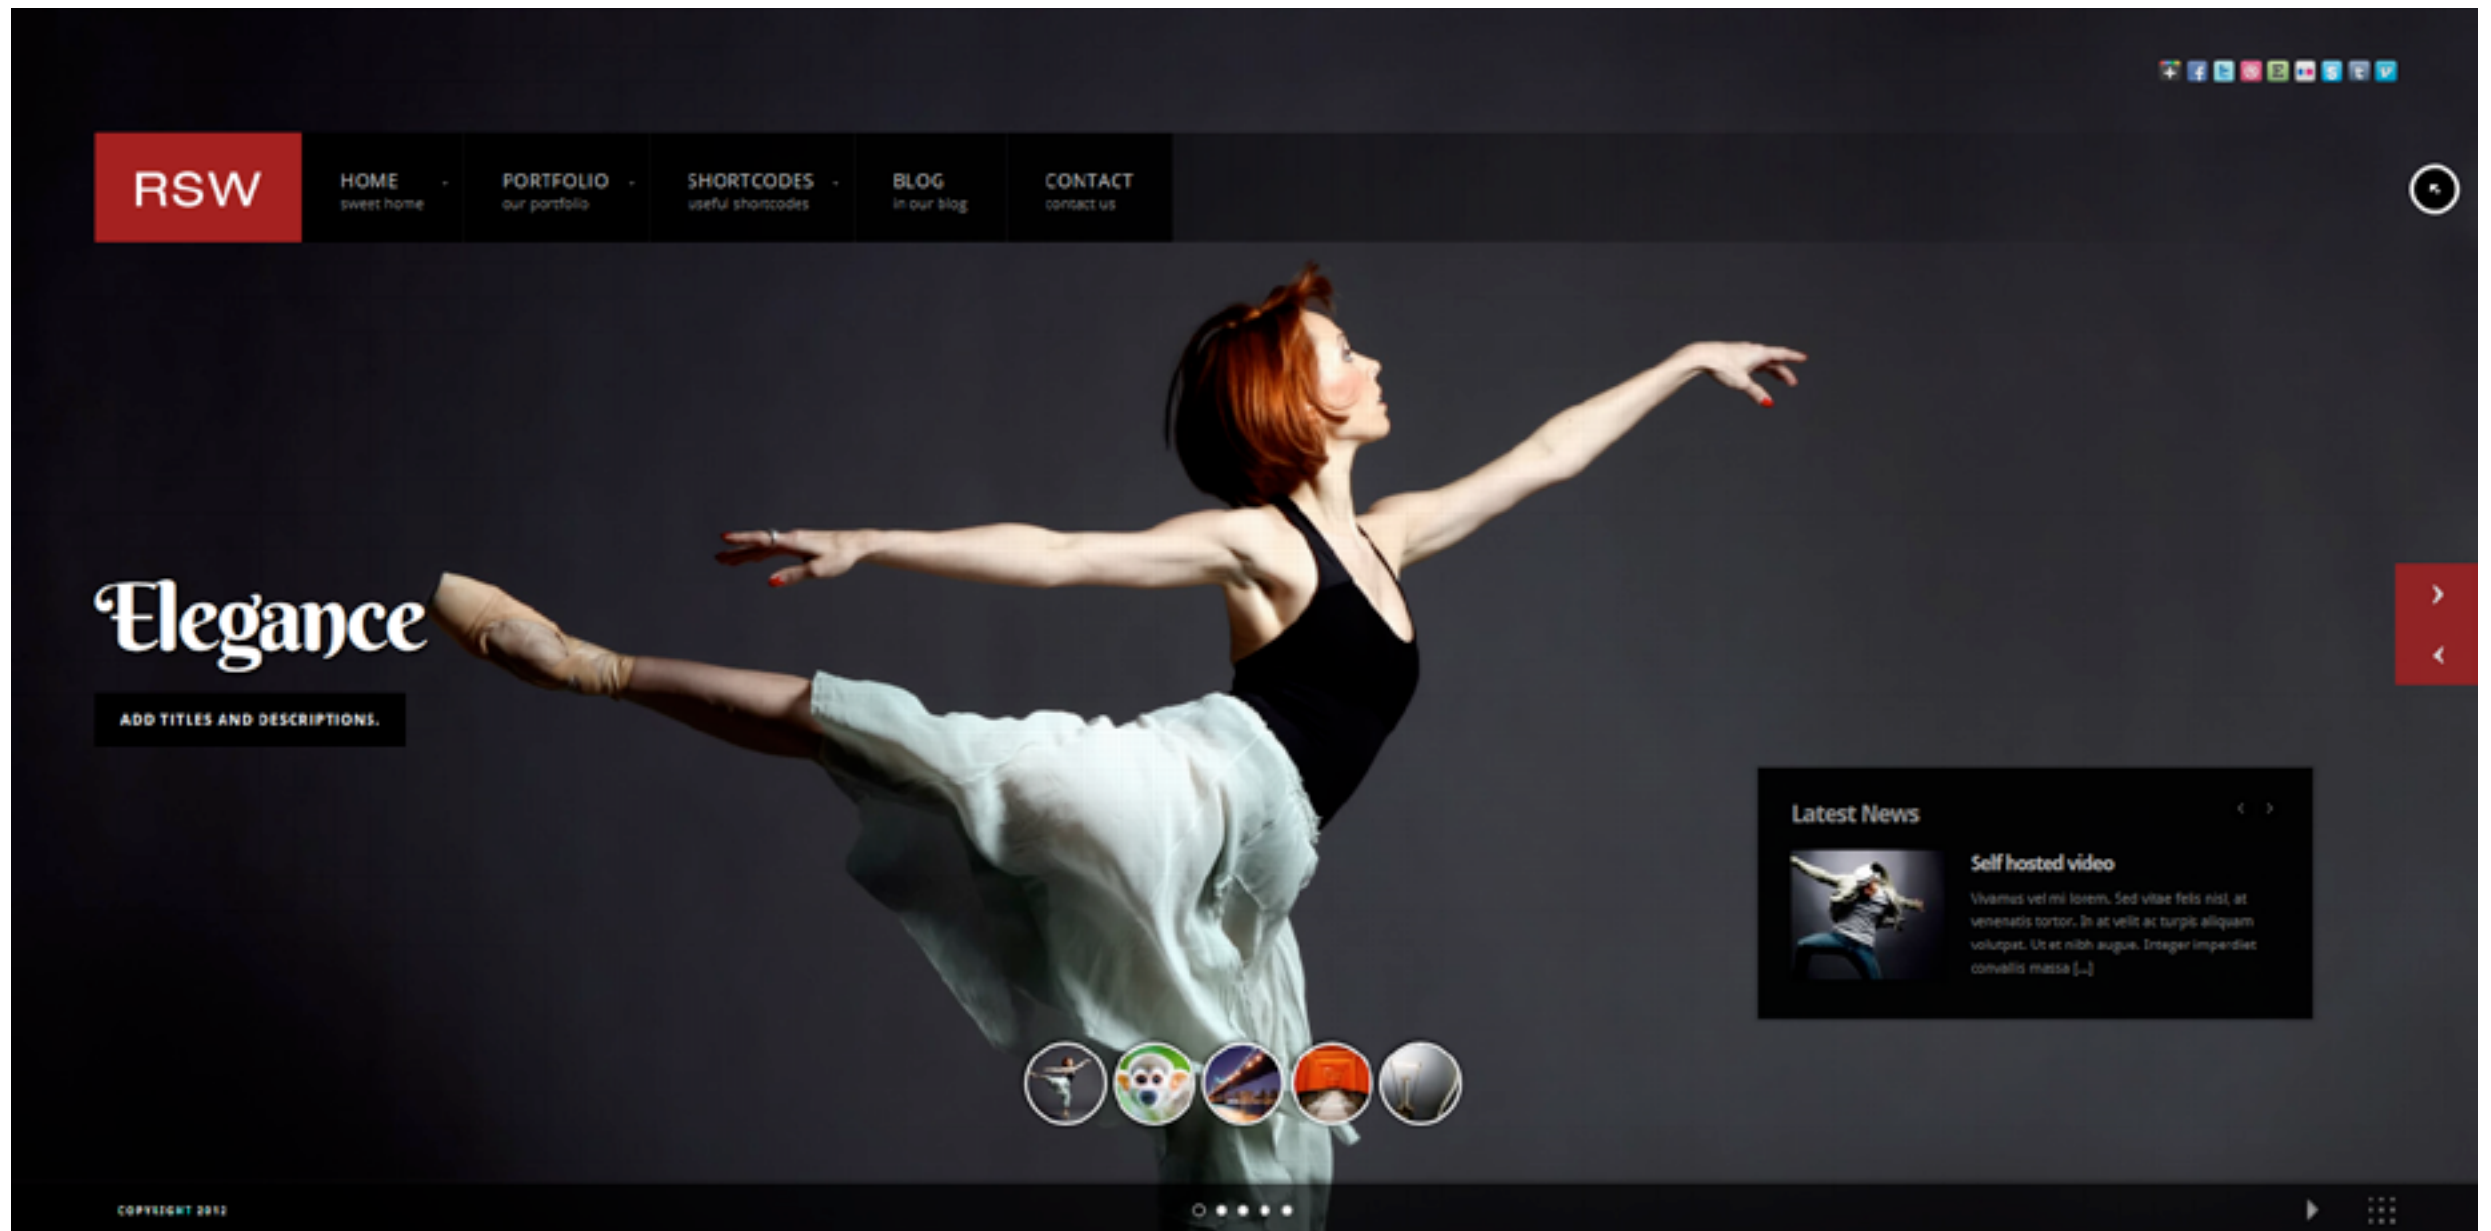

Theme options string variables is provided in theme root folder by file name wpml-config.xml . It requires WPML string translation plugin to translate these strings.

# Uploading RSW via FTP to Wordpress

1. Download the zipped theme pack to your local computer from themeforest and extract the ZIP file contents to a folder on your local computer.
2. Using an FTP client to access your host web server.
3. Upload the Theme files in the extracted folder called 'rsw' (its inside the extracted 'rsw-packed') to wp-content/themes directory provided by WordPress. Please make sure you're uploading the files from the extracted rsw zip.
4. Visit Administration > Appearance > Themes, under the Manage Themes tab, under the Available Themes, if necessary navigate to the page displaying that Theme, then click the Activate link to make the Theme, the Current Theme.

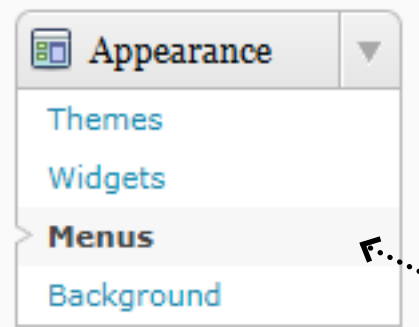

Once Activated you'll get the RSW theme options in the sidebar.

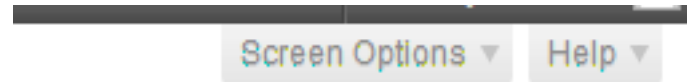

# Building the Menus

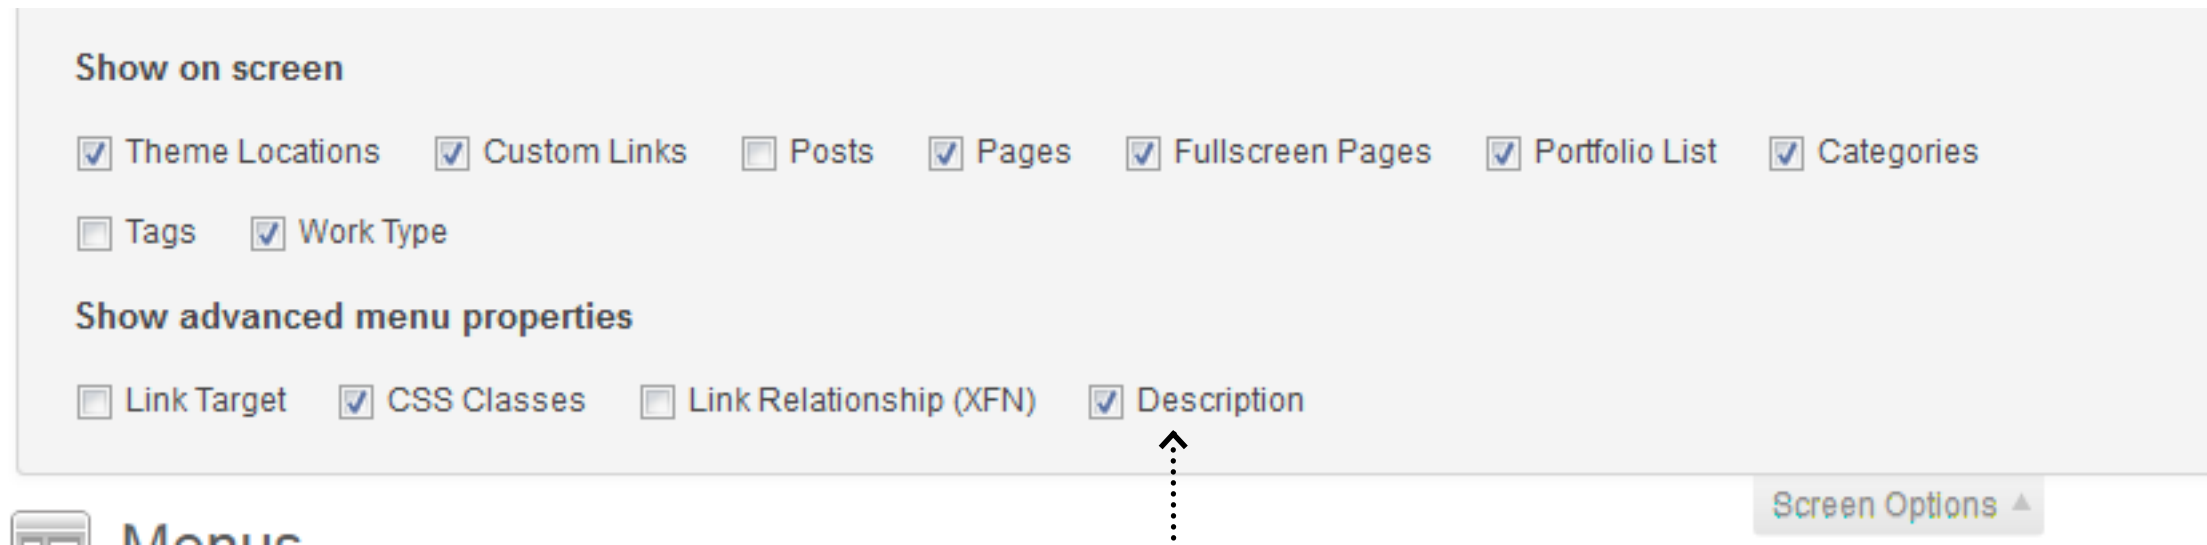

## - Enable Descriptions

**1**  
**Click Menu**  
Clicking will display Menu Builder Screen.

**2**  
**Screen Options**  
Click Screen Options. This tab is displayed on the top right corner of the browser window.

**3**  
**Enable Descriptions Check**  
Enable Descriptions Tab.

# Building the Menus

## - Create Menu

The image shows the WordPress 'Appearance' > 'Menus' interface. On the left, the 'Appearance' sidebar menu is open, with 'Menus' selected. An arrow points from this menu to the main content area. In the main content area, there is a tab with a '+' icon and a text input field labeled 'Menu Name' with the placeholder text 'Enter menu name here'. A blue 'Create Menu' button is to the right of the input field. Below this is a large text area containing instructions. Two numbered callouts are present: a red circle with '1' pointing to the 'Menu Name' input field, and a red circle with '2' pointing to the 'Create Menu' button.

**1** **Enter a Name**  
Enter an name for your Menu and Click Create Menu tab

**2** **Create Menu**

Menu Name

Create Menu

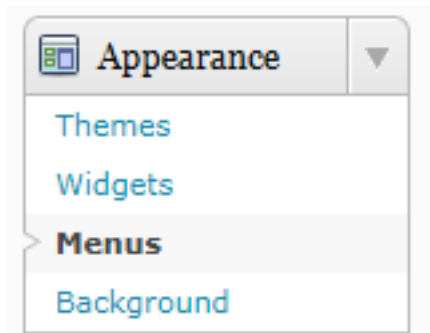

To create a custom menu, give it a name above and click Create Menu. Then choose items like pages, categories or custom links from the left column to add to this menu.

After you have added your items, drag and drop to put them in the order you want. You can also click each item to reveal additional configuration options.

When you have finished building your custom menu, make sure you click the Save Menu button.

# Password Protection

**Password protected fullscreen pages, portfolio galleries and pages.**

Once you publish a WordPress post, it is visible to the public (by default).

You can set a password to posts requiring anyone visiting the page to enter a password.

The image shows the 'Publish' sidebar in the WordPress admin interface. It includes buttons for 'Save Draft' and 'Preview'. The status is 'Draft' with an 'Edit' link. Under 'Visibility: Public', the 'Password protected' option is selected, marked with a red circle '1'. Below it is a text input field containing 'Put password here', marked with a red circle '2'. At the bottom, the 'Publish' button is highlighted with a red circle '3'. Other options include 'Public', 'Private', 'OK', 'Cancel', and 'Publish immediately'.

**This post is password protected. To view it please enter your password below:**

Fullscreen slideshows and Fullscreen Video protected screen displays Theme Options set Image as background when requesting for password.

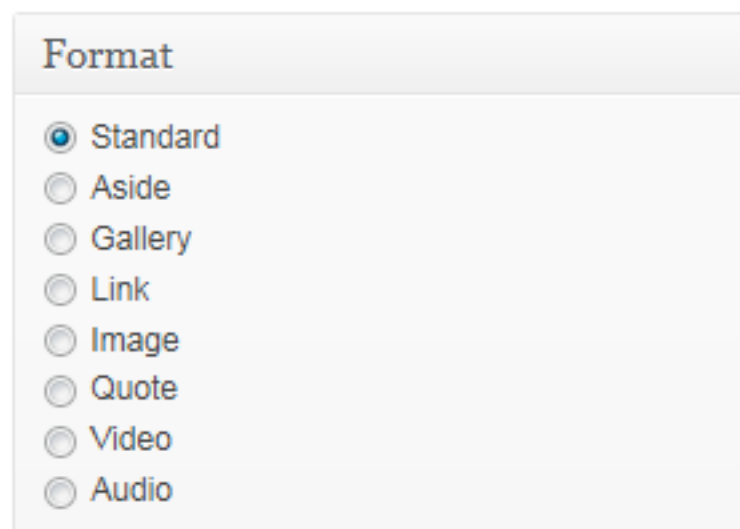

# Custom Post Formats

RSW theme can build you custom post formats. Post formats can be chosen from the Post Edit screen. The list appears as the below screen shot.

When you select a post format additional options will relating the the chosen post format. These extra options are available for Gallery, Link, Image, Quote, Video and Audio.

## 8 Custom post formats

# 1. Standard Post

The screenshot shows the WordPress 'Add New Post' interface. On the left, the 'Posts' sidebar contains links for 'All Posts', 'Add New' (marked with a red circle 1), 'Categories', and 'Tags'. Below this is the 'Format' section with radio buttons for 'Standard' (selected), 'Aside', 'Gallery', 'Link', 'Image', 'Quote', 'Video', and 'Audio'. A red circle 3 points to the 'Standard' option with the text 'Choose Standard Post Format'. Below the 'Format' section is the 'Featured Image' section with a link 'Set featured image' and a red circle 5 pointing to it with the text 'Featured Image' and 'Upload and set your Featured Image'. The main content area has a title field 'Enter title here' (marked with a red circle 2) and a rich text editor. The editor's toolbar includes 'Upload/Insert' and 'Visual'/'HTML' tabs. The editor content shows placeholder text: 'Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nunc velit lacus, fringilla non faucibus hendrerit, consequat vel risus. Cum sociis natoque'. A red circle 4 points to the editor content with the text 'Fill contents'. Below the editor is the 'General Metabox' containing settings for 'Background image from' (set to 'Theme options set image'), 'Custom background image URL' (with a placeholder URL), 'Choice of Sidebar' (set to 'Default Sidebar'), and a note 'For Sidebar Active Pages and Posts'. A red circle 6 points to the sidebar selection dropdown. At the bottom right, a 'Publish' button is shown with a red circle 7 pointing to it.

## 2. Aside post

An Aside is a custom post format which doesn't have a title. Very useful for small notes and such.

This is an Aside post. It's displayed without a title, very useful for posting quick notes. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Phasellus blandit porta tellus non vulputate. Nam in nulla ut augue bibendum aliquet eget eu velit. Suspendisse non ligula sit amet felis volutpat hendrerit eu ac odio. Etiam elementum dui vel libero laoreet sagittis. Vestibulum ac elit orci, et cursus mauris. Nulla vehicula lorem odio. Mauris vel mauris justo, sed adipiscing neque. Nam ipsum dolor, congue ac vestibulum eget, luctus nec ipsum.

No additional options.

## Shortcodes Generator

# Shortcodes GUI

The feature of Generating Shortcodes through the Post and Page editor makes it a breeze to apply Shortcodes. There is no longer need to memorize or refer to any of them. Clicking each shortcode button gives you a Pop-up with the configurations required to generate them right into the editor.

Complex text layouts can be generated using the Columns Shortcode.

## NOTE:

For the Shortcode GUI to be visible you'll need to be in the Post or Page editor in 'Visual' mode.

## NOTE:

The **Thumbnails** and **Slideshow** shortcodes require image attachments in the post or page it's generated in. Just upload Multiple images to the post or page and click save - no need to insert the image to the contents area manually. Once the shortcode is generated it'll pick the attached images and display them.
